

BEFORE THE PUBLIC UTILITIES COMMISSION OF NEVADA

NOTICE OF GREAT BASIN WATER CO.’S APPLICATION TO REVISE WATER TARIFFS NOS. 236, 238, 240 AND 241A TO IMPLEMENT THE DEFERRED WATER SERVICE ADJUSTMENT RATE MECHANISM RELATING TO THE ORDER ISSUED IN DOCKET NO. 21-12025 FOR ITS PAHRUMP, SPRING CREEK, COLD SPRINGS AND SPANISH SPRINGS DIVISIONS, AND FOR OTHER RELIEF PROPERLY RELATED THERETO

NOTICE IS HEREBY GIVEN that Great Basin Water Co. (“GBWC,” or the “Company”), on October 18, 2024, filed an Application with the Public Utilities Commission of Nevada (“Commission”), designated as Docket No. 24-10008, requesting that the Commission authorize it to add or change a schedule to recover amounts accrued in the deferred accounts authorized by the Commission in Docket No. 21-12025 for decoupling of revenues of the utility from the quantity of water sold in each of GBWC’s four water service divisions (Pahrump, Spring Creek, Cold Springs, and Spanish Springs), and for other relief properly related thereto. The Company’s request for approval of a new schedule is necessary to implement the deferred water service adjustment (“DWSA,” also known as “decoupling”) rate mechanism pursuant to NRS 704.663, which the Commission approved for each of GBWC’s four water service divisions in Docket No. 21-12025. As previously approved, the DWSA mechanism allows GBWC to recover the costs of providing service without regard to the difference in the quantity of water reasonably expected to be sold that which was actually sold. Pursuant to the previously-approved DWSA rate mechanism and GBWC’s calculations following a twelve-month tracking period, the tariff sheets proposed as part of this Application reflect either a sur-charge or sur-credit in each of the water service divisions to be applied to customer bills until the balance of the regulatory asset account established for each division to track the difference between water commodity revenues approved by the Commission in Docket No.21-12025 and revenues actually collected has been amortized.

If the Commission grants the application as filed: (a) a DWSA sur-credit would apply to water service in the Pahrump division at a rate of \$0.11 per 1,000 gallons for all tiers of usage and all water customers (with the exception of the Transmission Irrigation customer class); (b) a DWSA sur-charge would apply to water service in the Spring Creek division at a rate of \$0.47 per 1,000 gallons for all tiers of usage and all water customers; (c) a DWSA sur-charge would apply to water service in the Cold Springs division at a rate of \$0.14 per 1,000 gallons for all tiers of usage and all water customers; and (d) a DWSA sur-charge would apply to water service in the Spanish Springs division at a rate of \$0.09 per 1,000 gallons for all tiers of usage and all water customers. The proposed adjustments to GBWC’s Water Tariff No. 1-W are depicted as follows:

Deferred Water Service Adjustment

DIVISION	METERED CONSUMPTION	DEFERRED WATER SERVICE ADJUSTMENT SUR-CHARGE OR (SUR-CREDIT)
Pahrump	All tiers and customer classes (except Transmission Irrigation)	(\$0.11) per 1,000 gallons

Spring Creek	All tiers and customer classes	\$0.47 per 1,000 gallons
Cold Springs	All tiers and customer classes	\$0.14 per 1,000 gallons
Spanish Springs	All tiers and customer classes	\$0.09 per 1,000 gallons

The Commission may implement the DWSA sur-charges or sur-credits as proposed by the Company, or in an amount higher or lower than the adjustment proposed to provide that the rates are just and reasonable.

Additional information may be obtained from the Commission or at the Company's offices as follows:

- Relevant filings are available for public viewing at the Commission's website (<http://puc.nv.gov>) and will be available at the offices of the Commission: 1150 East William Street, Carson City, Nevada 89701 and 9075 West Diablo Drive, Suite 250, Las Vegas, Nevada 89148. To receive any further notices in this matter, a person must request in writing to be placed on the service list for this proceeding.

A complete copy of the Application is available for public viewing at the Company's business offices at 1240 State Street, Pahrump, Nevada 89048, 14891 Lamoille Highway, Spring Creek, Nevada 89815, and 1005 Terminal Way, Suite 294, Reno, Nevada 89502. A complete copy is also available on the Company's website at <https://www.myutility.us/greatbasinwater>. For more information on how to obtain a copy of the Application, customers can contact Great Basin Water Co. at (844) 694-4404 or email us at bewatersmart@greatbasinwaterco.com.
