Trisha Osborne
Assistant Commission Secretary
Public Utilities Commission of Nevada
1150 E. William Street
Carson City, NV 89701

Re: Docket 24-12003: Application of Great Basin Water Co. for authority to consolidate and increase its annual revenue requirements for water and sewer service and to consolidate and adjust the rates charged to all classes of customers in the Pahrump, Spring Creek, Cold Springs and Spanish Springs Divisions and for other relief properly related thereto.

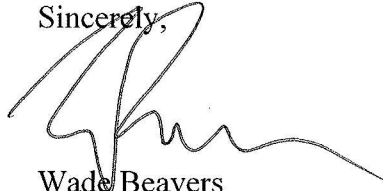

Dear Trisha:

Accompanying this letter for filing with the Public Utilities Commission of Nevada (the "Commission"), is Great Basin Water Co.'s Errata to its Application for authority to consolidate and adjust its annual revenue requirement for water and sewer service rates charged to all classes of customers in the Pahrump, Spring Creek, Cold Springs, and Spanish Springs divisions.

This Errata corrects a typographical error in the description of the Test Year in the body of the Application.

Should you have any questions, or require additional information, please advise.

Sincerely,

A handwritten signature in black ink, appearing to read 'Wade Beavers', with a long horizontal flourish extending to the right.

Wade Beavers

EXHIBIT A

1 water and sewer service rates promotes long term rate stability for customers by minimizing rate
2 shock, improving service affordability, and facilitating strategic planning and timing of capital
3 investments. Uniform rates also benefit customers through lower regulatory costs and reduced
4 billing complexities. This Application includes only those proposals the Company believes are
5 necessary for the continued provision of safe and reliable service at reasonable rates.

6 GBWC is proposing to phase in the full consolidation of water rates over a three (3) year
7 period following this rate case, such that incremental tariff changes would be implemented in
8 each of Year 1 (“Phase 1”) and Year 2 (“Phase 2”), with uniform water rates across customer
9 classes for all four (4) of GBWC’s Pahrump, Spring Creek, Cold Springs and Spanish Springs
10 divisions being achieved with the final tariff changes implemented in Year 3 (“Full
11 Consolidation”). GBWC is also proposing a full consolidation of sewer rates between the
12 Pahrump and Spring Creek Divisions immediately in Year 1 following this rate case. As an
13 alternative request, if the phase-in approach to consolidation of water rates is not approved,
14 GBWC requests by its Application that the Commission permit GBWC to implement the
15 proposed fully consolidated uniform rates for water (as with sewer) immediately in Year 1
16 following this rate case.

17 GBWC also presents in the Application, as an alternative request if full consolidation is
18 not approved by any means, individual revenue requirement models and rate design proposals for
19 each of its service divisions which, if approved as an alternative form of relief, would result in
20 various increases in each service division’s revenue requirement, as well as increases in the
21 monthly volumetric rates and fixed customer charges for water service and (as applicable), the
22 monthly customer charges for sewer service for all customer classes across all of GBWC’s
23 divisions, as described in more detail in the exhibits and testimony appended to the Application.

24 The test period for this Application began on August 1, 2023 and ended on July 31, 2024
25 (the “Test Year”). Results of the water and sewer operations of the Company are stated through
26 July 31, 2024, and the Company has estimated and will, pursuant to NRS 704.110(3), certify to
27 actual results through November 30, 2024. Additionally, the Company is utilizing an ECIC
28

EXHIBIT B

1 to implement uniform sewer rates that apply to all similar customers. Implementing uniform
2 water and sewer service rates promotes long term rate stability for customers by minimizing rate
3 shock, improving service affordability, and facilitating strategic planning and timing of capital
4 investments. Uniform rates also benefit customers through lower regulatory costs and reduced
5 billing complexities. This Application includes only those proposals the Company believes are
6 necessary for the continued provision of safe and reliable service at reasonable rates.

7 GBWC is proposing to phase in the full consolidation of water rates over a three (3) year
8 period following this rate case, such that incremental tariff changes would be implemented in
9 each of Year 1 (“Phase 1”) and Year 2 (“Phase 2”), with uniform water rates across customer
10 classes for all four (4) of GBWC’s Pahrump, Spring Creek, Cold Springs and Spanish Springs
11 divisions being achieved with the final tariff changes implemented in Year 3 (“Full
12 Consolidation”). GBWC is also proposing a full consolidation of sewer rates between the
13 Pahrump and Spring Creek Divisions immediately in Year 1 following this rate case. As an
14 alternative request, if the phase-in approach to consolidation of water rates is not approved,
15 GBWC requests by its Application that the Commission permit GBWC to implement the
16 proposed fully consolidated uniform rates for water (as with sewer) immediately in Year 1
17 following this rate case.

18 GBWC also presents in the Application, as an alternative request if full consolidation is
19 not approved by any means, individual revenue requirement models and rate design proposals for
20 each of its service divisions which, if approved as an alternative form of relief, would result in
21 various increases in each service division’s revenue requirement, as well as increases in the
22 monthly volumetric rates and fixed customer charges for water service and (as applicable), the
23 monthly customer charges for sewer service for all customer classes across all of GBWC’s
24 divisions, as described in more detail in the exhibits and testimony appended to the Application.

25 The test period for this Application began on ~~July~~August 1, 2023 and ended on July 31,
26 2024 (the “Test Year”). Results of the water and sewer operations of the Company are stated
27 through July 31, 2024, and the Company has estimated and will, pursuant to NRS 704.110(3),
